## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 9-15, drawn to an apparatus and a method of an ink jet printing comprising dividing the plurality of data block, allocating different mask patterns between superposed region of adjacent data blocks, classified in class 347, subclass 41.
- II. Claims 15-21 drawn to an recording apparatus comprising recording data divided into plurality of data block so that recording is performed on a leading end or rear end of the recording medium, classified in class 347, subclass 37.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the invention I has nothing do to with leading end or rear end of the recording medium as invention II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2853

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
